A screenshot of a Git commit history interface. On the left, a vertical timeline shows the sequence of commits with colored circles representing different branches (develop, feature, etc.). The main area displays a list of commits, each with a description, author, date, and commit hash. The commits are ordered chronologically from top to bottom.

Time tracking

Wat hebben we goed gedaan:

- Git kraken ging heel vlot de laatste week.
- Iedereen zijn mening werd gehoord

Wat hebben we geleerd:

- We hebben minder tijd verloren tijdens meetings.
- Togll timetracking ging veel beter. Iedereen trackte elk uur.
- Met Trello werken bleek uiteindelijk heel praktisch om het werk bij te houden.

Wat moeten we in de toekomst anders doen:

- Betere afspraken maken omtrent klassen en json objecten.
